

eXtplorer - PHP-based File Manager - Fehler #104

extplorer's code has different ways of version checking AND some \$_VERSION

12/22/2012 08:38 PM - Viktor Szépe

Status:	Neu		
Priority:	Niedrig		
Assignee:	Sören Eberhardt-Biermann		
Category:	ToDo		
Target version:			
eXtplorer Version:	2.1.2	Joomla! Version:	Joomla! 2.5
Description I suggest one central function that queries Joomla version info for all Joomla version. extplorer.list.php: global \$dir_up, \$mosConfig_live_site, \$_VERSION; seems OK: function ext_isJoomla header.php: if(is_object(\$GLOBALS['_VERSION']) class_exists('jversion')) { list.php: global \$dir_up, \$mosConfig_live_site, \$_VERSION; a lot of language files: maybe a simple search&replace solves this That is all. All the best wishes to you!
