<b>Status:</b>	Neu		
<b>Priority:</b>	Normal		
<b>Assignee:</b>	Sören Eberhardt-Biermann		
<b>Category:</b>	Bug		
<b>Target version:</b>			
<b>eXtplorer Version:</b>	2.1.2	<b>Joomla! Version:</b>	none
<b>Description</b>			
Hello,			
My Root directory must be something like that			
C:\Program Files\webserveur\www\extplorer\visual			
When you have in your path a "\v", this product an error, it doesn't find the folder, it reads			
C:\Program Files\webserveur\www\extplorerisual			

History

Hi,  
the path is interpreted as a RegEx, so you need to escape valid RegEx switches like \v.  
I'm just not sure, how you can escape it. Please try /\v or \\v

Hello,

in fact when I have installed eXtplorer, my root path was definied like this by myslef in .htusers.php :

```
array("chek","debd45af34d00201361b3d4d0ec99acd",dirname(dirname(__FILE__))."\share","http://localhost",1,"",7,1)
```

and it was OK.

When a user updated his password, the .htusers.php file has been edited automaticly like this :

```
array("chek","debd45af34d00201361b3d4d0ec99acd","C:\Program Files\webserveur\vhos\extplorer\share","http://localhost",1,"",7,1)
```

and then the problem arrived
