

eXtplorer - PHP-based File Manager - Fehler #164

Missing home directory => Directs to root

06/04/2014 02:51 PM - Paul Hasselgren

Status:	Neu	
Priority:	Normal	
Assignee:		
Category:		
Target version:		
eXtplorer Version:	2.1.4	Joomla! Version: none
Description		
First: thank you for this software. :)		
When a home directory specified in the .htusers.php is missing, then eXtplorer shows the eXtplorer installation directory.		
The version is 2.1.5. Standalone.
