Target version:		
eXtplorer Version:	2.1.4	Joomla! Version: none
Description When you login the please wait text is not localized: the fix is really simple open include/authentication/extplorer.php find Ext.get("statusBar").update("Please wait..."); replace with Ext.get("statusBar").update("<?php echo ext_Lang::msg('please_wait', true) ?>"); and add this string on all lanaguage file //missing localization added by selven "please_wait" => "Please wait..."
