eXtplorer Version:		Joomla! Version:

Description

if you take a joomla zip file and extract it with extplorer the extracted files cannot be installed. However, if instead you extract that same file with osefileman they can be.

I was able to replicate this on at least 10 quickstart bundles.

History

#1 - 10/22/2011 04:55 AM - Troy Hall

this is in 1.7.2 if it matters

#2 - 11/01/2011 02:49 AM - Troy Hall

wondering if we're going to get this fixed anytime soon?
