eXtplorer - PHP-based File Manager - Fehler #48

ERROR Message when trying to open Component

11/07/2011 06:59 AM - David Gough

Status:	Neu	
Priority:	Hoch	
Assignee:	David Gough	
Category:	Bug	
Target version:	2.1.0	
eXtplorer Version:		**Joomla! Version:**

Description

Have just installed the latest version of eXtplorer "com_eXtplorer_2.1.0RC5.zip" to my Joomla 1.5 site and I get the following error message ...

Fatal error: Cannot redeclare _pear_call_destructors() (previously declared in /home/perthblu/public_html/libraries/pear/PEAR.php:773) in /usr/local/php52/pear/PEAR.php on line 777

Can you please advise how to deal with this problem.

Many thanks, David
