eXtplorer - PHP-based File Manager - Fehler #49

Error when running RC5 on Joomla 1.7

11/21/2011 05:00 PM - Brandon Jackson

Status:	Neu	
Priority:	Normal	
Assignee:		
Category:	Bug	
Target version:	2.1.0	
eXtplorer Version:		**Joomla! Version:**

Description

EXTplorer keeps trying to load the directory listing over and over when trying to run extplorer. If I try to click on ftp mode and hit escape I can see the following error message:
Undefined variable: authentication_type in
/home/jackso17/public_html/tdccycle.com/administrator/components/com_extplorer/include/login.php on line 57

The page still shows it is not in FTP mode when displaying this error.
