

eXtplorer - PHP-based File Manager - Fehler #53

Can not edit files with Joomla 1.7.3

Category:	Bug	
Target version:	2.1.0	
eXtplorer Version:		Joomla! Version:
Description		
Everything works fine otherwise. I can upload files to the server and replace existing ones, but when modifying them (for example .css, .php, .xml, .html) I get "JSON Decode Error: dialog is undefined"		
Things work normally with Joomla 1.5.23 (and extplorer 2.0.1), but when moving to 1.7-series and eXtplorer 2.1.0RC5 it does not.		
I am willing to pay to solve this problem, cause I have several clients on the same server, who needs eXtplorer to work!		
Here is some information regarding the server:		
Database version 5.1.56		
Database Collation utf8_general_ci		
PHP-version 5.3.8		
Web server Apache/2		
WebServer to PHP Interface apache2handler		
Joomla! version Joomla! 1.7.3 Stable [Ember] 14-Nov-2011 14:00 GMT		
Joomla! Platform Version Joomla Platform 11.2.0 Stable+Modified [Omar] 27-Jul-2011 00:00 GMT
