Description		
In my setup, there's	it". the screen refreshes but I'm not logge no way to log out which is obviously very 2.1.0 on IIS 6.0 with PHP 5.2.10 and I ha	
Please help me out	; I seriously think extplorer is one of the b	pest web file managers out there but this is a very serious safety issue.
Thanks in advance.		
Regards,

I guess I caused and solved this issue myself; As it turns out, session.save_path was not set in php.ini After updating that, users can now log out.

Please close this issue
