<b>Description</b>		
<p>I've been using eXtplorer for a long time now. Had been working well up to installation of the the latest Joomla update 2.5.3. Since then the extensions hangs and fails to open error message "Notice: Undefined variable: authentication_type in /home/k4qky/public_html/joomlapatterns/administrator/components/com_extplorer/include/login.php on line 57"</p> <p>Any assistance to resolve this issue would be appreciated.</p> <p>Best regards and hope to hear from you,</p> <p>Don <a href="http://www.joomlapatterns.com">http://www.joomlapatterns.com</a></p>		

### History

#### #1 - 03/29/2012 12:53 PM - Sören Eberhardt-Biermann

Works perfectly for me on J! 2.5.3...

#### #2 - 04/26/2012 04:34 PM - Jay Reeves

I have the same problem on 3 different sites now that I upgrade from J!2.5.3 to 2.5.4.

It was working fine before the upgrade, but now I get a spinning wheel while it's trying to load, and if I click ftp, I get the same error Don mentions above.

Is upgrading J! what's breaking extplorer? I created a new site on J! 2.5.4, and extplorer works fine.
